(because healing happens fast in this office...)

Brainstem Balancing™ Care Plan Information:

Major Issues: To speed your recovery as fast as your body is able, plan on a few months of visiting us two or three times a week - most people will notice results almost instantly; however, *complete* Nerve System/Body Wellness is achieved over time.

Wellness: An ideal way to increase your whole body-mind wellness and remove years of built up stress is to get checked twice a week.

Visitors: People with lower stress lives, no major issues, or a mostly clear Central Nerve System may visit us as little as once every week or so.

No matter what frequency of care you choose, all clients should come in to get checked as soon as possible after a new physical, chemical, or emotional trauma.
